

COMPENG 2SH4 Project – Statement of Contribution

Your Group Name teamsize != 2

Your Name Gokul Radheepan

Your Team Member's Name 1 person team

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

As a single person team, the entirety of the code was written by me.

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

N/A

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

If I had a second collaborator, I believe that I could have gotten more work done, as well as had work divided more evenly. While it's easier on a deadline basis to have the project done by myself, it would have been better if I had another person as well to have completed various parts of the project and then combine it together for a final product.
